

BACKGROUND	I am a fifth-year Ph.D. student in the CVLab of Michigan State University, advised by Prof. Xiaoming Liu (Fellow of IEEE and IAPR). Before that, I was a Research Programmer at USC Information Sciences Institute, working with Prof. Iacopo Masi and Prof. Wael AbdAlmageed.		
RESEARCH INTERESTS	<ol style="list-style-type: none"> 1. Generative AI: Multi-modal Large Language Model (CVPR25 submission; NeurIPS24), Image Generative Model (ArXiv2024), and Multi-modal Learning (ECCV24). 2. Responsible AI: Image Forgery Detection (CVPR23; IJCV24) and face anti-spoofing (ECCV22).

INDUSTRY EXPERIENCE	<div> Amazon One, Seattle, WA, U.S.A May 2024 – Aug. 2024 <ul style="list-style-type: none"> • Applied Scientist Intern with Dr. Carlos D. Castillo and Dr. Hongcheng Wang • Working on anomaly detection and segmentation via multi-modal representation learning. </div> <div> Amazon Alexa, Los Angeles, CA, U.S.A May 2023 – Aug. 2023 <ul style="list-style-type: none"> • Applied Scientist Intern with Dr. Yue Rex Wu • Working on the identity-consistent face image generation, using stable diffusion and controlNet. </div> <div> Information Sciences Institute, USC, Los Angeles, CA, U.S.A Dec. 2018 – Nov. 2020 <ul style="list-style-type: none"> • Research Programmer with Prof. Iacopo Masi and Prof. Wael AbdAlmageed • Working on various research topics, such as Deepfakes detection, face-based disease diagnosis, sentence similarity prediction, and text entity relation extraction. </div>		

SELECTED RESEARCH PROJECT	Generalizable Deepfake Detection via Large Language Model	Dec. 2023 – Present
	<ul style="list-style-type: none"> Proposed a deepfake detection framework, which takes the image as the input and outputs the binary classification results and textual descriptions for better interpretation. These textual descriptions are generated by the incorporated LLM. 	
	Reverse Engineer: Parsing Generative Methods Hyper-parameters	Dec. 2022 – Dec. 2023
	<ul style="list-style-type: none"> Design a novel way to formulate the <i>model parsing</i> as a graph node classification task, using a directed graph to capture dependencies among different hyperparameters. 	
	Image Forgery Detection and Localization	Feb. 2022 – Oct. 2023
	<ul style="list-style-type: none"> Develop a unified algorithm for image forgery detection and localization (IFDL), regardless of whether the image is generated in image editing or digital domains. 	
	Face Presentation Attack Detection	May 2021 – Mar. 2022
	<ul style="list-style-type: none"> Proposed a face anti-spoofing (FAS) algorithm, which achieves the best face-modality performance in the IAPRA ODIN (link) project, outperforming 10 different college research teams. Propose a multi-domain learning algorithm to help the FAS algorithm maintain remarkable detection performance in both source and target domain datasets. This work is published in ECCV2022. 	
EDUCATION	Michigan State University , East Lansing, MI, U.S.A	2021–2025 (expected)
	<ul style="list-style-type: none"> Ph.D. in Computer Science, GPA:3.6/4.0. Advisor: Prof. Xiaoming Liu. 	
	University of Southern California , Los Angeles, CA, U.S.A	2016–2018
	<ul style="list-style-type: none"> M.Sc., Computer Science. GPA:3.2/4.0. 	
	Wuhan University of Technology , Wuhan, Hubei, China.	2011–2015
	<ul style="list-style-type: none"> B.Sc., Electronics and Telecommunications. GPA:3.8/4.0. 	
HONORS AND AWARDS	<ul style="list-style-type: none"> <i>Student Travel Award</i> in AAAI. 	2019.
	<ul style="list-style-type: none"> <i>Excellent Graduation Thesis Award</i> in Hubei Province. (Scale: 1%) 	2015.
	<ul style="list-style-type: none"> <i>Outstanding Graduates</i> in Wuhan University of Technology. (Scale: 10%) 	2015.
TECHNICAL SKILLS	<ul style="list-style-type: none"> <i>Programming Languages</i>: Python, Java, C/C++. 	
	<ul style="list-style-type: none"> <i>Tools</i>: PyTorch, Tensorflow, Linux, Vim, Git, Latex.
